Dear Tony,

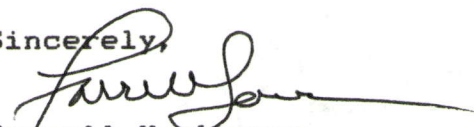

I reviewed your written assessment of what took place during our meeting with you and the people from Utah County on May 14, 1992, and found it to be accurate.

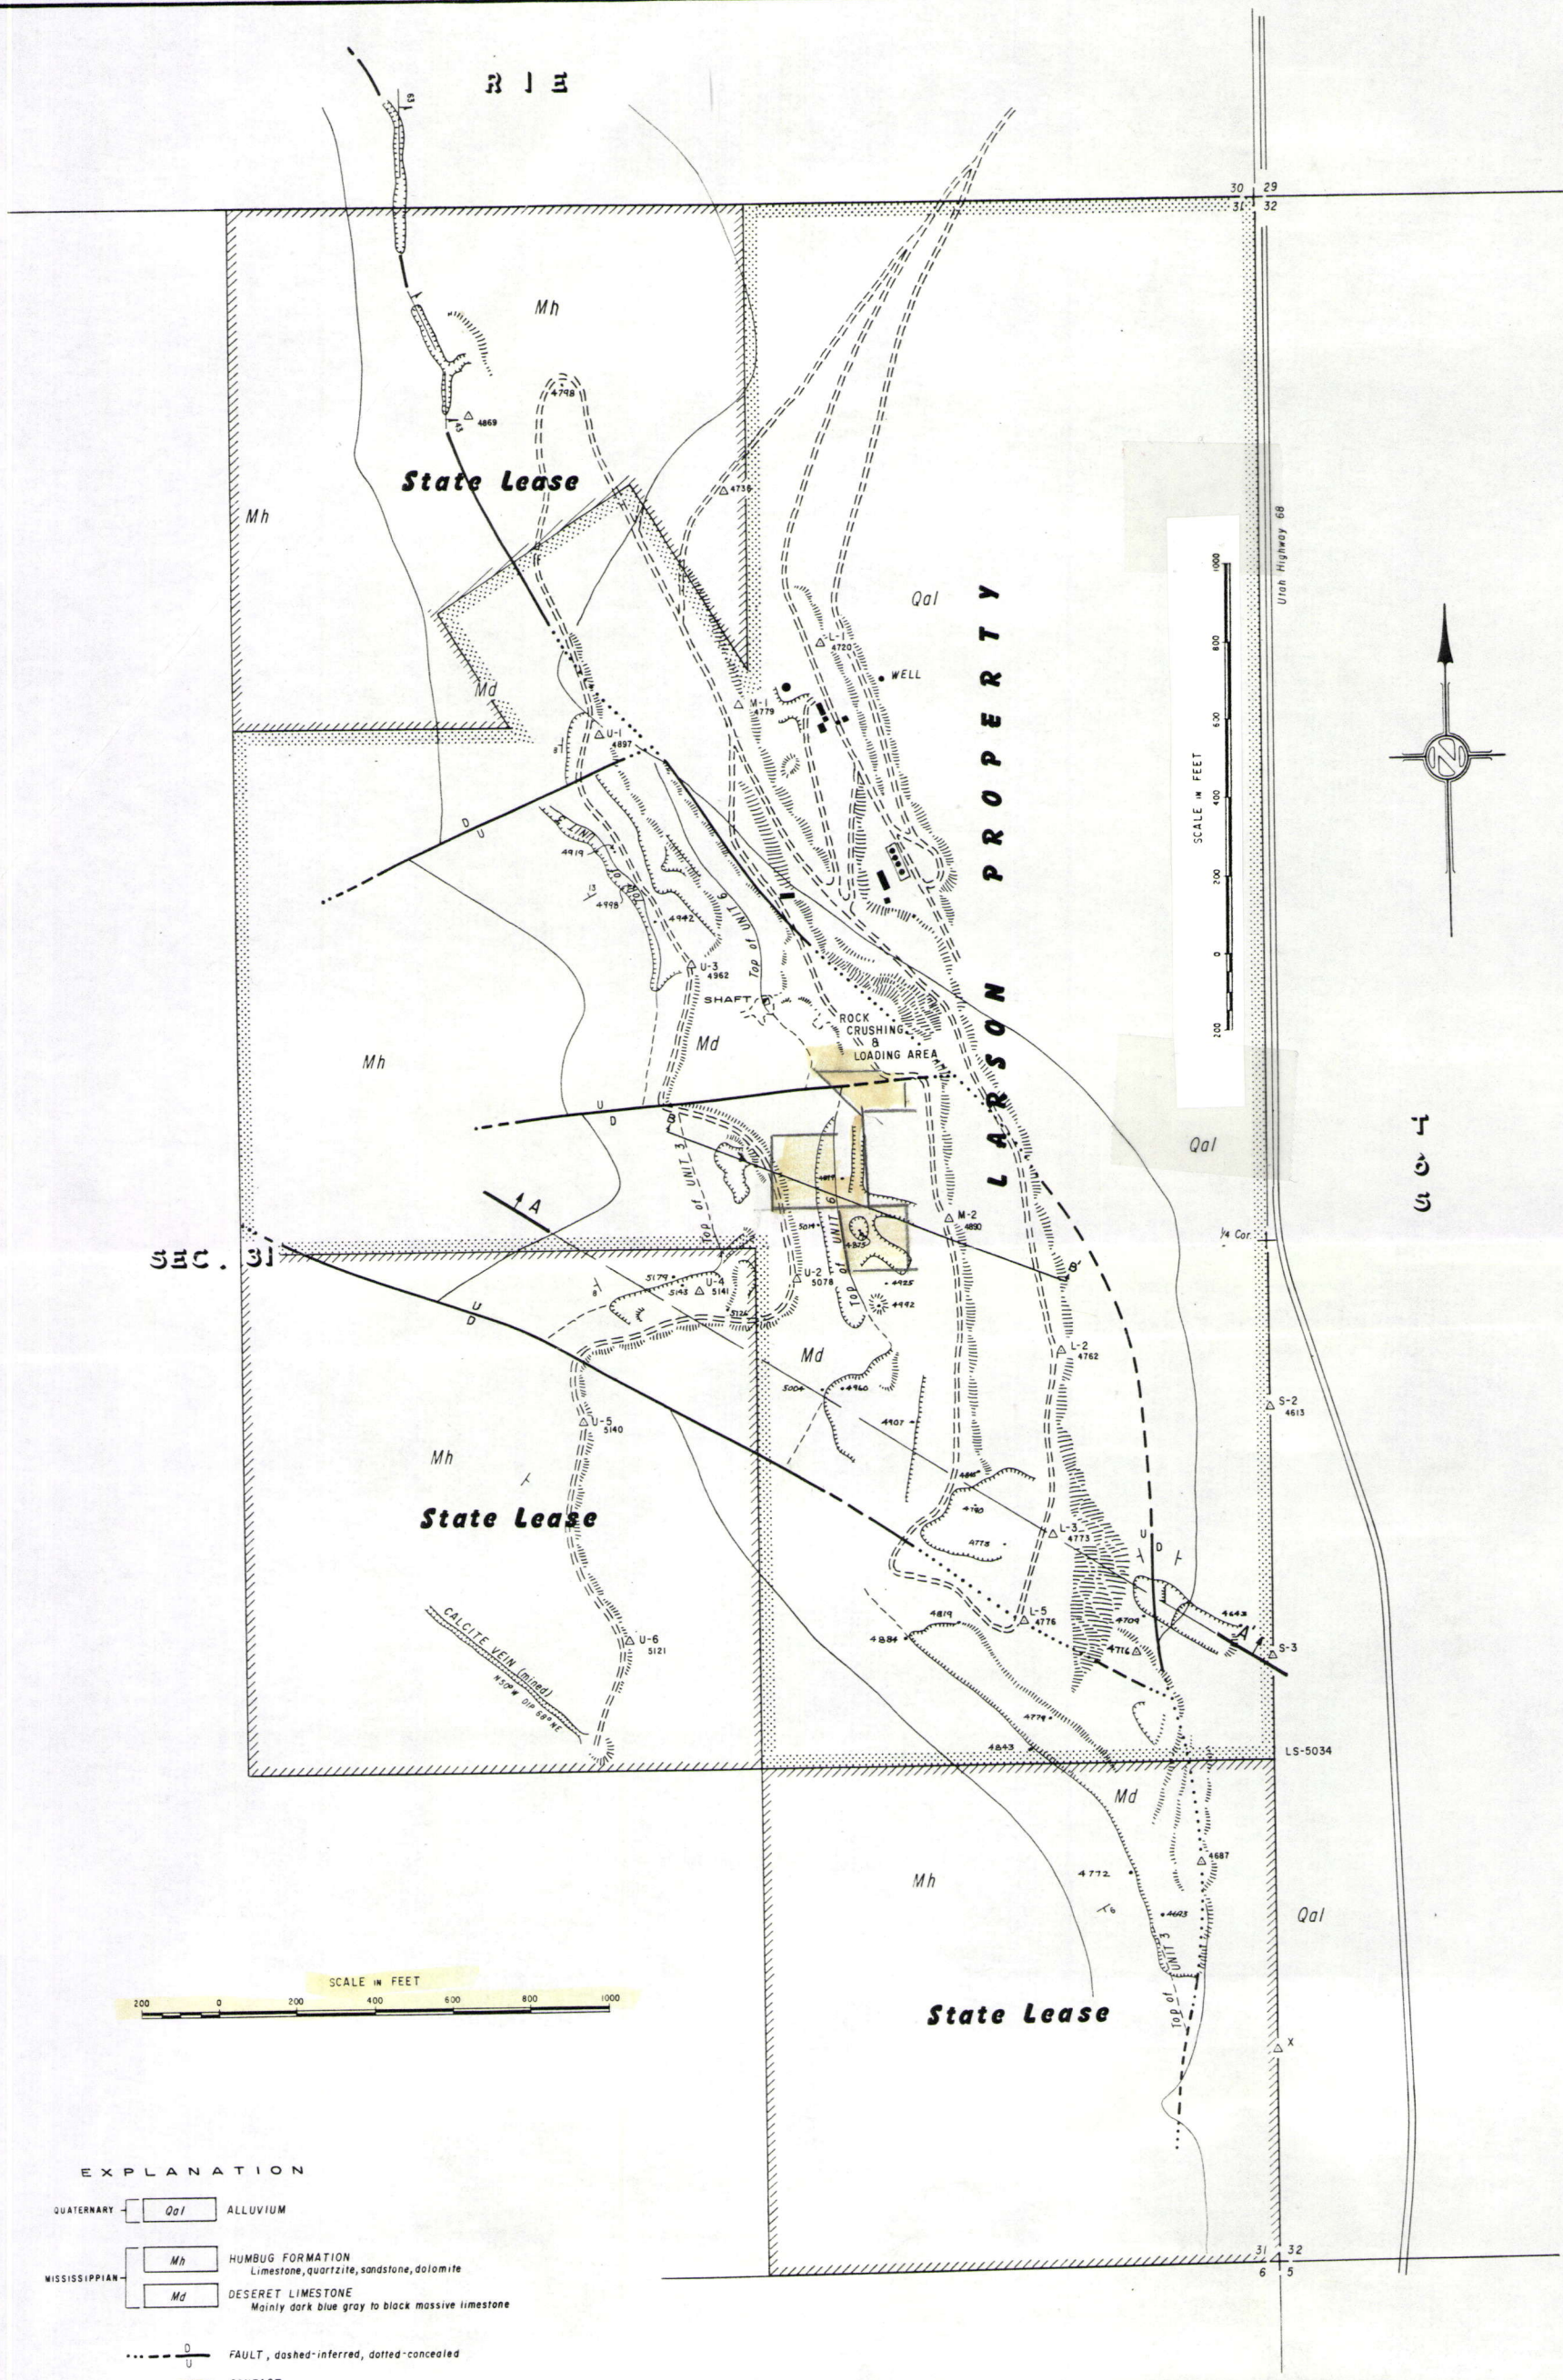

I have enclosed a copy of the map of the Larson Limestone Quarry and have highlighted in yellow those areas where we are working. The area of this activity is approximately 3.5 acres.

Concerning the roads, I noticed that we have been given a variance dated May 16, 1988 for those roads which have a post mine use. Under section R647-3-109 of your rules and regulations it states in part 8 that those roads could be turned over to the property owner if they have a use for them. While we are the property owners as well, and as we stated, we have a desire to travel to the uppermost parts of our property, we would most definitely want these roads left in place.

I would appreciate us being able to bring this matter to a conclusion as soon as possible.

Sincerely,

Farrell V. Larson
Larson Limestone Co., Inc.

- EXPLANATION**
- QUATERNARY Qal ALLUVIUM
 - MISSISSIPPIAN Mh HUMBUG FORMATION
Limestone, quartzite, sandstone, dolomite
 - Md DESERET LIMESTONE
Mainly dark blue gray to black massive limestone
 - FAULT, dashed-inferred, dotted-concealed
 - - - CONTACT
 - - - DIP & STRIKE of bedding
 - SHAFT
 - TOP of SLOPE
 - CUT, PIT
 - FILL
 - U-5 5121 TRIANGULATION STATION
